

## Quickstart Guide

**Box Contents** LFM1, (2) AAA Batteries, Quickstart Guide

**Operation** Before using LFM1, install **2 AAA** batteries into the small box inside the headband.

The controls for LFM1's lights are on the small box inside the headband:

- **To power LFM1 on/off**, set the power switch to **On/Off**.
- **To adjust how sensitive the sound-reactive lights are**, adjust the dial.
  - When set to **Min**, the lights will react only to louder sounds.
  - When set to **Max**, the lights will react even to quieter sounds.

To wash the mask, first remove the small box from inside the headband and gently pull the wire connectors apart. Then wash the mask by hand in water for **no more than 30 minutes**. Before reconnecting the small box, make sure the mask and its wire connectors are completely dry.

During use, if the lights are lighting up in the opposite direction, remove the small box from inside the headband, gently pull the wire connectors apart, flip one of the connectors over, and reconnect them.

## Safety & Warranty Information

Read and keep these instructions. Heed all warnings and follow all instructions. Do not use this apparatus near water. Clean only with dry cloth. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat. Only use attachment/accessories specified by the manufacturer. This product should be kept away from direct contact with liquids. The apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.

**Caution:** Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type. Batteries (a battery pack or an installed battery) shall not be exposed to excessive heat such as sunshine, fire, etc.

**Warning:** Excessive sound pressure (high volumes) can cause hearing loss.

**Warning:** To reduce the risk of fire or electrical shock, do not expose this appliance to rain or moisture. Electrical equipment should **never** be kept or stored in damp environments.

**ESD/EFT Warning:** This unit may contain a microcomputer for signal processing and control functions. In very rare situations, severe interference, noise from an external source, or static electricity may cause it to lock up. In the unlikely event that this should happen, turn off the unit, wait at least five seconds, and then turn it back on again. The pins of connectors identified with this ESD warning symbol should not be touched.

For best audio quality, avoid using this device in a high RF-radiated environment. In an environment with radio frequency interference, the unit may malfunction and resume normal operation after removal of the interference.

### Disposing of General Purpose & Alkaline Batteries:

- Alkaline batteries can be safely disposed of with normal household waste. Never dispose of batteries in fire because they could explode.
- Alkaline batteries are composed primarily of common metals—steel, zinc, and manganese—and do not pose a health or environmental risk during normal use or disposal.
- It is important not to dispose of large amounts of alkaline batteries in a group. Used batteries are often not completely “dead.” Grouping used batteries together can bring these “live” batteries into contact with one another, creating safety risks.
- Proven cost-effective and environmentally safe recycling processes are not yet universally available for alkaline batteries. Some communities offer recycling or collection of alkaline batteries. Contact your local government for disposal practices in your area.

**California Proposition 65 Warning:** This product may contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. (California law requires this warning to be given to customers in the State of California.)
